Good evening, Aryan 3

Track your readiness and take your next best action.

Target program
B.A. (Hons.) Economics
Shri Ram College of Commerce

Your next best action · Physics

Strengthen Electrostatic Potential and Capacitance

Accuracy is 0% over 14 attempts. Recovering this topic could win back up to 84 marks.

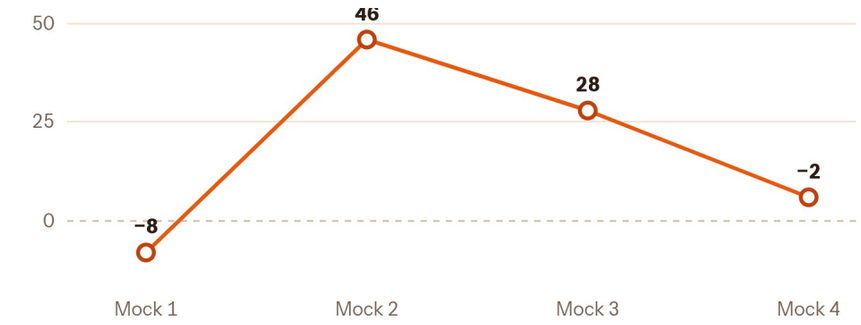

Read concept summary

Cycle 2 50 of 150 questions

Latest mock	Recent accuracy	Questions attempted	Study streak
−2 / 250	**22%**	**200**	**1 day**
Physics Full Mock 50	44 of 200 correct	Across 4 tests	Consecutive practice days

Critical score leaks

Chronic careless errors

Apply a no-change rule: keep your first answer unless you can name a specific flaw. Practise 10 questions daily on a strict 2-minute timer.

Start fix

Zero accuracy: Electrostatics and EM waves

0 of 27 correct. Pause new practice and re-read NCERT Class 12 Chapters 2 and 8, focusing on derivations and sign conventions.

Start fix

Low accuracy: modern physics

Dual Nature of Radiation sits at 15% and Atoms at 18%. Build a formula sheet and solve 5 targeted problems daily.

Start fix

Topics to fix

Electric Charges and Fields	33%	Magnetism and Matter	29%
Dual Nature of Radiation and Matter	15%	Alternating Current	9%
Electrostatic Potential and Capacitance	0%	Ray Optics and Optical Instruments	18%

Personalised 7-day score accelerator

Day 1 · 45m
Electrostatic Potential and Capacitance

Day 2 · 45m
Electromagnetic Waves

Day 3 · 45m
Dual Nature of Radiation

Day 4 · 45m
Atoms

Day 5 · 60m
Careless error audit

Day 6 · 45m
Moving Charges and Magnetism

Day 7 · 90m
Mock test simulation

Target for your next mock

Reduce careless errors to under 20 and reach 40%+ accuracy in Electrostatic Potential and Capacitance.

Physics

Based on 200 questions · 26 Oct 2026

Compare

Net score	Accuracy	Lost marks
64	22%	−156

You attempted all 200 questions. The main issue is not a lack of knowledge but extreme carelessness: 154 of 156 errors were careless mistakes.
