Q.1 Read the given passage and answer the four questions that follow:-

The aim of life should be to reach one's full potential in body, mind, heart, and spirit. When we see an electric bulb, we think of Thomas Edison, the inventor of the bulb and lighting system. The sound of an aeroplane reminds us of the Wright Brothers, who proved man could fly. A ringing telephone brings to mind Alexander Graham Bell. A unique scientist, Sir C.V. Raman, pondered why the horizon looks blue during sea travel, leading to his Nobel Prize-winning explanation of light scattering.

The world is fortunate to have Mahatma Gandhi, who fought for India's independence and inspired South Africa's fight against apartheid. Madam Marie Curie won two Nobel Prizes—one in 1903 for discovering radium and another in 1911 for her research in chemistry. She is the discoverer of radiation that saves the lives of cancer patients today, improves crop yields, powers industry and nuclear weapon systems.

These individuals walked unexplored paths and strived to be unique, leaving lasting contributions to humankind. Every youth desires to be unique, but society often pressures them to conform. The challenge is to fight the hardest battle to become a "Unique You."

Alexander Graham Bell once said, "Don't stay on the beaten path; explore the woods. You'll find something new. Follow it; one discovery will lead to another." This advice inspires us to leave familiar trails and discover our potential.

Are you willing to become a unique personality, or will you settle for being like everyone else? The choice is yours.

Select the core message of the passage from the options given below:

1. Striving for uniqueness leads to growth and contribution.

Q.5 Read the given passage and answer the four questions that follow:-

My summer holidays had begun, and I had promised my grandfather to join him on his morning walk. The mild sunshine and fresh air were new to me, as I had never been a morning person. My grandfather, an early riser, didn’t need gadgets to track his routine. On the first morning, I realised what I had been missing—the refreshing air, the scent of flowers, and the serenity reserved for early risers. The Sun painted the sky in hues of orange and yellow, creating a breathtaking view.

Dressed in track pants and sneakers, we followed his regular route. He called out to stray dogs, feeding them biscuits he carried daily. He knew their names and even their ages. Birds chirped melodiously, and sweepers cleaned the streets, their brooms making a rhythmic swishing sound. Other walkers milled around a tea shop, sipping hot tea. My grandfather exchanged pleasantries with them, displaying a warm camaraderie.

As we returned after an hour, the peaceful atmosphere gave way to the hustle of the day. Women decorated their homes with vibrant rangoli, a charming Indian tradition. During the walk, my grandfather shared insights about Indian life and stories from his past. I realised the walk wasn’t just exercise—it was a communion with nature and a lesson in appreciating life’s quiet beauty. Grateful for this new experience, I understood the profound value of these moments with my grandfather.

The actual purpose of his grandfather’s morning-walk routine was:-

1. more than just an exercise; it connected him with nature
2. a refreshing and mandatory routine for everyone.
3. not purely a physical workout, but mental too for his grandchildren.
4. a time for discussing daily routine chores.

Q.9 Read the given passage and answer the four questions that follow:-

Just as he was about to enter the laboratory, Farley noticed that a great deal of activity was taking place in a nearby anteroom. The assistant tried to hurry him past but by dint of dragging his feet Farley managed to steal a quick glance into the room. The sight that met his eyes was so bewildering that he uttered no protest when his guide maneuvered him through the laboratory door. What he saw was this: the woman, Mangala was seated at the far end of the room, on a low divan, but alone and in an attitude of command, as though enthroned. By her side were several small bamboo cages, each containing a pigeon. On the floor, clustered around the woman's feet, were some half-dozen people in various attitudes of supplication. Two or three others were huddled against the wall, wrapped in blankets. Although Farley had glanced into their scarred, unseeing faces for more than an instant, he recognized at once that they, like the man he had seen in the bamboo thicket, were syphilitics, in the final stages of the terrible disease.

Now the young assistant began once again to perform the charade of the previous day, fetching slides, and hurrying back and forth across the room as though egging him on towards some extraordinary discovery. Farley went mechanically about the business of examining the slides they presented him.

His conscience called out to him to go outside and tell them not to waste their hopes on whatever quackery it was that this woman offered; to expose the falsehoods that she and her minions had concocted to deceive those simple people. It was his duty, he knew, to tell them that mankind knew one cure for their condition; that this false prophetess was cheating them of money they could ill afford.

Farley's assistant didn't want him to linger at the entrance of the laboratory as -

1. Farley was getting late for his appointments.
2. Farley was on the verge of discovering something important.
3. he didn't want Farley to notice the ongoings of the anteroom.
4. he had hidden some people there

Options 1. 1
