

Q.1 Read the given passage and answer the four questions that follow :-

Obesity has nearly trippled globally since 1975, a first in the history of our species. It contributes to at least 200 known diseases and complications, including strokes and cancer. Now, there's a way to solve that problem with a slash. New drugs like Ozempic can cause people to lose 5-24% of their body weight. In Magic Pill: The Extraordinary Benefits and Disturbing Risks of the New Weight Loss Drugs, Johann Hari offers a nuanced explanation, as an overweight person who takes these medicines himself.

Ozempic works by making food intake infeasible beyond small quantities. A hormone called GLP-1 in the gut and brain was found to affect insulin and blood sugar, and affect feelings of satiety. Drug companies invented 'agonists' or copies of this hormone that can last longer in the body.

In 2005, it was approved for use by diabetics. When it turned out that these patients were also losing a lot of weight, the Danish company Novo Nordic funded tests on whether it could be used on obese people. As per the official trial results of semaglutide, those who'd been given the drug lost 15% of their body weight, making it the most successful weight-loss drug in history.

The word 'nuanced' means ____.

1. ungraded
2. unrefined
3. exclusive of subtle differences
4. inclusive of subtle differences

Options 1. 1

2. 2
3. 3

Q.5 Read the given passage and answer the four questions that follow :-

All those people who say that the weather hasn't been normal recently are right. However, since there is really no such thing as normal weather, they probably mean something else. If they mean that average summer temperatures have been getting warmer, then they are certainly correct. In fact, it is not just the summer temperature, but the general average temperature of the whole world that has been steadily moving up. The signs are everywhere. There are small signs. for example, butterflies in North America have moved about 60 miles north of where they used to live . There are also very large signs. Huge masses of ice in mountain glaciers and the Arctic are melting. The famous snow cap on Africa's Mount Kilimanjaro has almost disappeared. Actually, ice or snow doesn't really disappear, it turns into water, flows into the ocean and causes sea levels to rise. Why is this happening? One answer is that it could simply be part of a natural process. After all, there have been long periods of warmth in the past. So we could just be experiencing another warming trend. This kind of answer had more supporters in the past. What scientists now believe is that human activity is the cause. For more than two hundred years, humans have been gradually changing the atmosphere, mainly as a result of industrial pollution. We have created an atmosphere around the earth that, like a giant glass container, lets heat from the sun through and holds it inside.

Identify the statements which are false.

- (A) Butterflies in North America have moved about 200 miles away.
- (B) Global Warming is a natural process.
- (C) Scientists blame human activities as a cause of global warming.
- (D) Huge masses of ice in mountain glaciers are melting.

Choose the correct answer from the options given below :-

- 1. (A) only

Q.9 Read the given passage and answer the four questions that follow :-

Little Mrs. Sommers one day found herself the unexpected possessor of fifteen dollars. It seemed to her a very large amount of money, and the way in which it stuffed and bulged her worn old portemonnaie (purse) gave her a feeling of importance such as she had not enjoyed for years.

The question of investment was one that occupied her greatly. For a day or two she walked about apparently in a dreamy state, but really absorbed in speculation and calculation. She did not wish to act hastily, to do anything she might afterward regret.

But it was during the still hours of the night that she seemed to see her way clearly toward a proper and judicious use of the money. A dollar or two should be added to the price usually paid for Janie's shoes, which would ensure their lasting an appreciable time longer than they usually did.

She would buy so and so many yards of percale for new shirt waists for the boys and Janie and Mag. Mag should have another gown. She had seen some beautiful patterns, veritable bargains in the shop windows. And still there would be left enough for new stockings-two pairs apiece-and what darning that would save for a while! She would get caps for the boys and sailor-hats for the girls. The vision of her little brood looking fresh and dainty and new for once in their lives excited her and made her restless and wakeful with anticipation.

What gave Mrs. Sommers a feeling of importance?

1. The thought of her children's compliments.
2. A long overdue promotion at work.
3. The idea of winning a lottery.
4. The way the money bulged her purse.
