Q.41 Read the passage and answer the questions:

Agrarian

Relations: Mughal Period

One of the most important chronicles was the *Ain-i Akbari* authored by Akbar's court historian Abu'l Fazl. This text meticulously recorded the arrangements made by the state to ensure cultivation, to enable the collection of revenue by the agencies of the state and to regulate the relationship between the state and rural magnates, the zamindars. The zamindars held extensive personal lands termed *milkiyat*, meaning property. *Milkiyat* lands were cultivated for the private use of zamindars, often with the help of hired or servile labour. The zamindars could sell, bequeath or mortgage these lands at will. The term which Indo-Persian sources of the Mughal period most frequently used to denote a peasant was *raiyyat* or *muzarian*. Sources of the seventeenth century refer to two kinds of peasants — *khud-kashta* and *pahi-kashta*. The former were residents of the village in which they held their lands. The latter were non-resident cultivators who belonged to some other village, but cultivated land elsewhere on a contractual basis.

The *Ain* is made up of five books, of which the first three books describe the administration. The first book, called *manzil-abadi*, concerns the imperial household and its maintenance. The second book, *sipah-abadi*, covers the military and civil administration and the establishment of servants. The third book, *mulk-abadi*, is the one which deals with the fiscal side of the empire and provides rich quantitative information on revenue rates, followed by the "Account of the Twelve Provinces".

Q.46 Read the passage and answer the questions:

Quit

India Movement

After the failure of the Cripps Mission, Mahatma Gandhi decided to launch his third major movement against British rule. This was the “Quit India” campaign, which began in August 1942. Although Gandhiji was jailed at once, younger activists organised strikes and acts of sabotage all over the country. Particularly active in the underground resistance were socialist members of the Congress, such as Jayaprakash Narayan. In several districts, such as Satara in the west and Medinipur in the east, “independent” governments were proclaimed. The British responded with much force, yet it took more than a year to suppress the rebellion. “Quit India” was genuinely a mass movement, bringing into its ambit hundreds of thousands of ordinary Indians. It especially energised the young who, in very large numbers, left their colleges to go to jail. However, while the Congress leaders languished in jail, Jinnah and his colleagues in the Muslim League worked patiently at expanding their influence. It was in these years that the League began to make a mark in the Punjab and Sind, provinces where it had previously had scarcely any presence. Quit

India Movement

After the failure of the Cripps Mission, Mahatma Gandhi decided to launch his third major movement against British rule. This was the “Quit India” campaign, which began in August 1942. Although Gandhiji was jailed at once, younger activists organised strikes and acts of sabotage all over the country. Particularly active in the underground resistance were socialist members of the Congress, such as Jayaprakash Narayan. In several districts, such as Satara in the west and Medinipur in the east, “independent” governments were proclaimed. The British responded with much force, yet it took more than a year to suppress the rebellion. “Quit India” was genuinely a mass movement, bringing into its ambit hundreds of thousands of ordinary Indians. It especially energised the young who, in very large numbers, left their colleges to go to jail.
